

## # Exam / Exam

US ABDOMEN/PELVIS- URINARY TRACT INFECTION

Date of exam / Exam Date

August 28, 2022 07:36

### RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Pediatric patient presenting with guarding, 12 hours of pain, and unremarkable previous imaging.

### PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

### FINDINGS:

No focal hepatic lesions detected. Liver contour is smooth; no masses seen. No gallstones, wall thickening, or pericholecystic fluid. No evidence of cholecystitis. No signs of pyelonephritis. No abnormal Doppler flow in spleen. No post-void residual urine detected. Appendix not clearly visualized; moderate complex free fluid consistent with perforation. Complex fluid with internal echoes. Complex fluid collection 1.5cm in RLQ, consistent with abscess.

### IMPRESSION:

Appendiceal perforation with intra-abdominal fluid.

Recommend urgent surgical consultation.

Case ID: CASE-J6H0G1-12639
