US ABDOMEN/PELVIS- RENAL COLIC

Date of exam / Exam Date

January 13, 2021 11:38

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

17-year-old Male presenting with intermittent abdominal pain and vomiting.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

Liver contour is smooth; no masses seen. Liver margins are regular and smooth. Gallbladder wall is thin. Gallbladder is contracted, no abnormal findings. Kidneys show normal Doppler flow. No evidence of splenomegaly. Bladder is well-distended and normal. No abnormal peri-appendiceal findings. Small amount free fluid in RLQ adjacent to appendix. No sonographic evidence of intussusception.

IMPRESSION:

Equivocal result, consider further evaluation.

Clinical correlation recommended. If high suspicion persists, consider surgical evaluation.
