

## # Exam / Exam

US ABDOMEN/PELVIS- RECURRENT ABDOMINAL PAIN

Date of exam / Exam Date

October 12, 2018 22:01

### RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Child with inflammatory bowel disease and acute abdominal pain.

### PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

### FINDINGS:

Liver contour is smooth; no masses seen. Gallbladder wall is thin. Kidneys show normal Doppler flow. Spleen size within normal limits. Bladder wall is smooth and regular. Appendix dilated to 12mm, non-compressible, with fat stranding. Complex free fluid in RLQ. Mild ascites noted. Liver echogenicity is within normal limits.

### IMPRESSION:

Appendicitis confirmed by ultrasound.

Recommend urgent surgical consultation.
