

## # Exam / Exam

US ABDOMEN/PELVIS- INTESTINAL OBSTRUCTION

Date of exam / Exam Date

June 09, 2019 00:08

### RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Child with inflammatory bowel disease and acute abdominal pain.

### PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

### FINDINGS:

The liver is normal in size and echotexture. Gallbladder wall is thin. No evidence of cholecystitis. Mildly increased echogenicity of renal cortex; clinical significance uncertain. Spleen appears normal for age. Bladder wall is smooth and regular. Blind-ending tubular RLQ structure, 11mm, with increased vascularity. No free fluid seen in abdomen or pelvis. Mesenteric fat appears normal.

### IMPRESSION:

Appendicitis confirmed by ultrasound.

Recommend urgent surgical consultation.

Case ID: CASE-DK89M5-12655
