US ABDOMEN/PELVIS- CONSTIPATION

Date of exam / Exam Date

July 10, 2019 00:35

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Child with hematuria and right-sided abdominal pain.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

No evidence of hepatic steatosis. No signs of portal hypertension. No evidence of cholecystitis. No perinephric fluid collections. Splenic parenchyma is homogeneous. Spleen is mildly enlarged, likely reactive. The bladder is fluid-filled and unremarkable. No appendicolith detected. Trace free fluid in pelvis, non-specific. Mild bowel wall thickening of terminal ileum.

IMPRESSION:

Unremarkable abdominal ultrasound with normal appendix.

If suspicion remains high, consider surgical evaluation.

Case ID: CASE-O53SQO-11185
