

Exam / Exam

US ABDOMEN/PELVIS- GASTROENTERITIS

Date of exam / Exam Date

October 23, 2022 06:09

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Child with inflammatory bowel disease and acute abdominal pain.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

Liver margins are regular and smooth. The liver appears homogeneous. Gallbladder wall is thin. No renal calculi, masses, or hydronephrosis detected. Renal parenchyma appears homogeneous. Splenic parenchyma is homogeneous. Spleen appears normal for age. Bladder wall is smooth and regular. Appendix dilated to 10mm, non-compressible, with fat stranding. Complex fluid with internal echoes. Reactive mesenteric lymphadenopathy seen.

IMPRESSION:

Sonographic features of appendicitis.

Recommend urgent surgical consultation.
