

Exam / Exam

US ABDOMEN/PELVIS- DIARRHEA

Date of exam / Exam Date

March 19, 2020 19:20

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Child with inflammatory bowel disease and acute abdominal pain.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

Liver contour is smooth; no masses seen. No gallstones, wall thickening, or pericholecystic fluid. No sonographic findings suggestive of cholecystitis. Renal parenchyma appears homogeneous. No evidence of splenomegaly. Bladder is well-distended and normal. No free fluid or fat stranding detected. Complex free fluid in RLQ. Reactive mesenteric lymphadenopathy seen.

IMPRESSION:

Equivocal result, consider further evaluation.

Clinical correlation recommended. If high suspicion persists, consider surgical evaluation.

Case ID: CASE-8IDD86-14014
