

Exam / Exam

US ABDOMEN/PELVIS- ABDOMINAL TRAUMA

Date of exam / Exam Date

March 26, 2023 23:36

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Pediatric patient with abdominal distention and tenderness.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

Mild hepatomegaly noted; otherwise unremarkable. Gallbladder is well-distended and normal. No perinephric fluid collections. No renal calculi, masses, or hydronephrosis detected. No focal splenic lesions noted. No intravesical masses or debris. Technical factors limit visualization of appendix. Complex free fluid in RLQ. Mild bowel wall thickening of terminal ileum.

IMPRESSION:

Study limited; cannot exclude early appendicitis.

Clinical correlation recommended. If high suspicion persists, consider surgical evaluation.

Case ID: CASE-O6NA66-13003
