US ABDOMEN/PELVIS- GASTRIC PAIN

Date of exam / Exam Date

September 21, 2021 14:39

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Pediatric patient with abdominal distention and tenderness.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

Liver parenchyma is normal. No abnormal Doppler signals in gallbladder. Gallbladder wall is thin. Both kidneys are symmetric in size and show normal corticomedullary differentiation. Renal parenchyma appears homogeneous. Spleen size within normal limits. No post-void residual urine detected. Peri-appendiceal fluid and fat stranding seen. Small amount free fluid in RLQ adjacent to appendix. No abnormal bowel wall thickening.

IMPRESSION:

Ultrasound findings suggest acute appendicitis.

Recommend urgent surgical consultation.

Case ID: CASE-OLU75U-12617
