

Exam / Exam

US ABDOMEN/PELVIS- RLQ PAIN

Date of exam / Exam Date

December 28, 2023 19:29

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Child with inflammatory bowel disease and acute abdominal pain.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

The liver is normal in size and echotexture. Mild hepatomegaly noted; otherwise unremarkable. The gallbladder is unremarkable. Gallbladder is well-distended and normal. No renal calculi, masses, or hydronephrosis detected. Splenic parenchyma is homogeneous. No evidence of splenomegaly. Bladder is well-distended and normal. Appendix is visualized and normal, measuring 4mm. It is compressible with normal wall thickness. Loculated fluid in pelvis. No sonographic evidence of intussusception.

IMPRESSION:

Abdominal ultrasound within normal limits.

Recommend supportive care and observation.
