

## # Exam / Exam

US ABDOMEN/PELVIS- VOMITING WITH ABDOMINAL PAIN

Date of exam / Exam Date

August 10, 2022 13:56

### RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

12-year-old Male with 3 days of RLQ pain and vomiting.

### PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

### FINDINGS:

Mild hepatomegaly noted; otherwise unremarkable. No sludge or masses. Gallbladder wall is thin. Renal sinus anatomy is intact. Spleen appears normal for age. Bladder demonstrates normal wall thickness. No evidence of inflammation in RLQ. Moderate free fluid in pelvis. Prominent mesenteric lymph nodes in RLQ, largest 12mm.

### IMPRESSION:

Mesenteric lymphadenitis without appendicitis.

If suspicion remains high, consider surgical evaluation.
