US ABDOMEN/PELVIS- SUSPECTED ABSCESS

Date of exam / Exam Date

April 01, 2022 02:15

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Child with hematuria and right-sided abdominal pain.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

The liver shows mild increased echogenicity, likely due to technical factors. No sonographic findings suggestive of cholecystitis. Mildly increased echogenicity of renal cortex; clinical significance uncertain. No abnormal Doppler flow in spleen. Bladder appears normal. No appendicolith detected. No peritoneal fluid collections. Visualized bowel loops are unremarkable.

IMPRESSION:

No acute abdominal abnormalities detected.

If suspicion remains high, consider surgical evaluation.

Case ID: CASE-8QJ8T9-10339
