US ABDOMEN/PELVIS- PALPABLE MASS

Date of exam / Exam Date

March 17, 2021 17:24

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Patient with previous appendectomy presenting with RLQ pain.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

The liver appears homogeneous. Gallbladder is contracted, no abnormal findings. No perinephric fluid collections. No perisplenic fluid collections. Bladder demonstrates normal wall thickness. Peri-appendiceal fluid and fat stranding seen. Moderate free fluid in pelvis. No significant lymphadenopathy.

IMPRESSION:

Findings consistent with acute appendicitis.

Recommend urgent surgical consultation.

Case ID: CASE-4I6T2Z-11888
