US ABDOMEN/PELVIS- ABDOMINAL DISTENTION

Date of exam / Exam Date

December 19, 2020 18:14

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

13-year-old Male with post-surgical abdominal pain.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

The liver is normal in size and echotexture. No sonographic findings suggestive of cholecystitis. Renal parenchyma appears homogeneous. Renal sinus anatomy is intact. No abnormal Doppler flow in spleen. Bladder wall shows no abnormal thickening. No free fluid or fat stranding detected. Complex free fluid in RLQ. No evidence of tumor or mass.

IMPRESSION:

Equivocal result, consider further evaluation.

Clinical correlation recommended. If high suspicion persists, consider surgical evaluation.

Case ID: CASE-4H12PN-12309
