

## # Exam / Exam

US ABDOMEN/PELVIS- FEVER AND ABDOMINAL PAIN

Date of exam / Exam Date

October 14, 2023 08:10

### RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Child with 3 days history of vomiting and abdominal swelling.

### PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

### FINDINGS:

The liver shows mild increased echogenicity, likely due to technical factors. Liver echogenicity is within normal limits. Gallbladder wall is thin. Kidneys are normal in size and echotexture for age. Kidneys are normal in size and echotexture for age. No abnormal Doppler flow in spleen. Spleen is mildly enlarged, likely reactive. Bladder appears normal. No evidence of inflammation in RLQ. Free fluid with echoes, suggestive of inflammation. No sonographic evidence of intussusception. No evidence of hepatic steatosis.

### IMPRESSION:

Equivocal result, consider further evaluation.

Clinical correlation recommended. If high suspicion persists, consider surgical evaluation.
