

Exam / Exam

US ABDOMEN/PELVIS- APPENDICITIS

Date of exam / Exam Date

September 10, 2024 15:07

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Pediatric patient presenting with elevated CRP, a week of pain, and unremarkable previous imaging.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

The liver shows mild increased echogenicity, likely due to technical factors. No signs of portal hypertension. Gallbladder is well-distended and normal. No gallstones, wall thickening, or pericholecystic fluid. Renal sinus anatomy is intact. Kidneys are normal in size and echotexture for age. Spleen appears normal for age. Bladder wall is smooth and regular. Appendix wall shows increased Doppler flow. Trace free fluid in pelvis, non-specific. No evidence of bowel obstruction.

IMPRESSION:

Acute appendicitis.

Recommend urgent surgical consultation.

Case ID: CASE-JMTA2U-13322
