

Exam / Exam

US ABDOMEN/PELVIS- PEDIATRIC ABDOMINAL PAIN

Date of exam / Exam Date

March 24, 2024 19:26

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Child with inflammatory bowel disease and acute abdominal pain.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

Liver echogenicity is within normal limits. Liver contour is smooth; no masses seen. The gallbladder is unremarkable. Gallbladder is contracted, no abnormal findings. Mildly increased echogenicity of renal cortex; clinical significance uncertain. No focal splenic lesions noted. Bladder is well-distended and normal. Visualization limited by patient movement and bowel gas. No peritoneal fluid collections. Mild ascites noted.

IMPRESSION:

Equivocal findings; clinical correlation advised.

Clinical correlation recommended. If high suspicion persists, consider surgical evaluation.
