

Exam / Exam

US ABDOMEN/PELVIS- RLQ PAIN

Date of exam / Exam Date

August 21, 2019 18:02

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Pediatric patient with abdominal distention and tenderness.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

No hepatic cysts or vascular anomalies. No sludge or masses. The right kidney measures 5.8cm and the left kidney measures 6.0cm. Both kidneys are unremarkable. Spleen is mildly enlarged, likely reactive. Bladder is well-distended and normal. Appendix not clearly visualized; moderate complex free fluid consistent with perforation. No free fluid seen in abdomen or pelvis. Visualized bowel loops are unremarkable.

IMPRESSION:

Perforated appendix, abscess identified.

Recommend urgent surgical consultation.

Case ID: CASE-O93FBH-12126
