US ABDOMEN/PELVIS- UNEXPLAINED VOMITING

Date of exam / Exam Date

April 02, 2022 08:40

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

10-year-old Male with since last night of RLQ pain and diarrhea.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

Liver parenchyma is normal. Gallbladder is well-distended and normal. The right kidney measures 6.5cm and the left kidney measures 6.7cm. Both kidneys are unremarkable. Spleen appears normal for age. Splenic parenchyma is homogeneous. Bladder wall is smooth and regular. Appendix is visualized and normal, measuring 4mm. It is compressible with normal wall thickness. Complex fluid with internal echoes. No abnormal Doppler flow in bowel loops. No focal hepatic lesions detected. Enlarged lymph node, short axis 20mm.

IMPRESSION:

Study is normal.

Recommend ultrasound surgical consultation.
