US ABDOMEN/PELVIS- INTUSSUSCEPTION

Date of exam / Exam Date

June 26, 2020 14:11

### RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Pediatric patient with palpable RLQ mass and pain.

### PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

### FINDINGS:

No evidence of hepatic steatosis. No gallstones, wall thickening, or pericholecystic fluid. Both kidneys are symmetric in size and show normal corticomedullary differentiation. No abnormal Doppler flow in spleen. Bladder demonstrates normal wall thickness. Technical factors limit visualization of appendix. Complex fluid with internal echoes. Mild bowel wall thickening of terminal ileum.

### IMPRESSION:

Study limited; cannot exclude early appendicitis.

Clinical correlation recommended. If high suspicion persists, consider surgical evaluation.

Case ID: CASE-BJFPQ4-13220
