US ABDOMEN/PELVIS- RECURRENT ABDOMINAL PAIN

Date of exam / Exam Date

November 20, 2019 14:34

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Pediatric patient with abdominal distention and tenderness.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

No signs of portal hypertension. No peri-hepatic fluid seen. Gallbladder is well-distended and normal. No evidence of cholecystitis. No renal calculi, masses, or hydronephrosis detected. Splenic contour is smooth. No perisplenic fluid collections. No evidence of cystitis. Appendix not clearly identified despite thorough evaluation. Complex fluid with internal echoes. No sonographic evidence of intussusception.

IMPRESSION:

Inconclusive study for appendicitis.

Clinical correlation recommended. If high suspicion persists, consider surgical evaluation.

Case ID: CASE-JZUKOP-14167
