

Exam / Exam

US ABDOMEN/PELVIS- RIGHT LOWER QUADRANT TENDERNESS

Date of exam / Exam Date

September 07, 2021 00:29

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

4-year-old Female presenting with intermittent abdominal pain and vomiting.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

The liver shows mild increased echogenicity, likely due to technical factors. The gallbladder is unremarkable. Renal sinus anatomy is intact. Splenic parenchyma is homogeneous. The bladder is fluid-filled and unremarkable. No evidence of inflammation in RLQ. Trace free fluid in pelvis, non-specific. No abnormal fluid collection detected.

IMPRESSION:

Inconclusive study for appendicitis.

Clinical correlation recommended. If high suspicion persists, consider surgical evaluation.

Case ID: CASE-X998RB-12314
