

PROTOCOLE OPERATOIRE / OPERATIVE REPORT

Site: Hopital Notre-Dame

Date: 2024-06-23 21:41

Anesthésiste / Anesthetist: Dr. John Evans

Chirurgien / Surgeon: Dr. Marie-Claire Dubois

Assistant(s): Dr. resident Jake Turner

Diagnostic préopératoire / Pre-operative diagnosis:

LOCALIZED PERITONITIS SECONDARY TO APPENDICITIS.

Diagnostic postopératoire / Post-operative diagnosis:

APPENDICITIS WITH MESENTERIC LYMPHADENITIS.

Opération / Operation:

APPENDECTOMY WITH LYSIS OF ADHESIONS.

Tissu envoyé en pathologie / Tissue sent to pathology: Appendix and abscess wall

Anesthésie / Anesthesia: General anesthesia with mask induction

Historique et constatations opératoires / History and operative findings:

15-year-old female with one week abdominal pain. Treated for viral syndrome; symptoms persisted. Imaging: ultrasound showing phlegmonous appendicitis.

Procédure(s) opératoire(s) / Operative procedure(s):

Patient in supine position. General anesthesia with nitrous oxide administered. Time-out was performed and abdomen prepped in sterile fashion. Direct trocar insertion after skin and fascia incision. Accessory port placed in epigastric region. No iatrogenic injuries occurred during trocar placement. Upon entering the abdominal cavity, significant adhesions noted. Intraoperative examination revealed friable appendix. Multiple small abscesses were encountered. Dense adhesions were encountered during dissection. The surrounding tissues showed mild reaction. We carefully dissect the inflammatory mass and identify the ruptured appendix. The appendiceal artery is ligated and divided. Endoscopic stapling is used for appendiceal division. Specimen placed in EndoCatch bag for removal. Saline is used for thorough irrigation of all quadrants. Fascial closure is performed at the umbilical site using Maxon 2-0. The skin is closed with non-absorbable Prolene 4-0.

Monitor for signs of infection; advance diet as tolerated. No intraoperative complications occurred. The patient tolerated the procedure well with minimal blood loss.

Case ID: CASE-N10YF9-10718
