

Exam / Exam

US ABDOMEN/PELVIS- RECURRENT ABDOMINAL PAIN

Date of exam / Exam Date

December 10, 2021 23:07

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Child with inflammatory bowel disease and acute abdominal pain.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

Liver parenchyma is normal. The gallbladder is unremarkable. Gallbladder wall is thin. Kidneys show normal Doppler flow. Mildly increased echogenicity of renal cortex; clinical significance uncertain. No abnormal Doppler flow in spleen. Spleen size within normal limits. No intravesical masses or debris. Blind-ending tubular RLQ structure, 8mm, with increased vascularity. Moderate free fluid in pelvis. Complex fluid collection 2.1cm in RLQ, consistent with abscess.

IMPRESSION:

Appendicitis with peri-appendiceal inflammation.

Recommend urgent surgical consultation.

Case ID: CASE-96Q7J2-13125
