

## # Exam / Exam

US ABDOMEN/PELVIS- GASTROENTERITIS

Date of exam / Exam Date

February 13, 2020 19:26

### RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

Pediatric patient with abdominal distention and tenderness.

### PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

### FINDINGS:

Mild hepatomegaly noted; otherwise unremarkable. The liver is normal in size and echotexture. Gallbladder wall is thin. Gallbladder is well-distended and normal. No perinephric fluid collections. No perisplenic fluid collections. Bladder wall shows no abnormal thickening. Appendix not visualized, may be normal in children. Small amount free fluid in RLQ adjacent to appendix. Small bowel loops distended, clinical significance uncertain. No abnormal bowel wall thickening.

### IMPRESSION:

Indeterminate RLQ findings.

Clinical correlation recommended. If high suspicion persists, consider surgical evaluation.

Case ID: CASE-016UN3-11134
