

## # Exam / Exam

US ABDOMEN/PELVIS- GASTROENTERITIS

Date of exam / Exam Date

October 24, 2023 11:51

### RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

6-year-old Female with sudden onset of abdominal pain and history of constipation.

### PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

### FINDINGS:

The liver shows mild increased echogenicity, likely due to technical factors. No gallstones, wall thickening, or pericholecystic fluid. Gallbladder wall is thin. Mildly increased echogenicity of renal cortex; clinical significance uncertain. No focal splenic lesions noted. Bladder appears normal. Appendix is compressible, with no surrounding inflammation. Complex free fluid in RLQ. No abnormal fluid collection detected. Small bowel loops distended, clinical significance uncertain.

### IMPRESSION:

Abdominal ultrasound within normal limits.

Advise urgent clinical assessment.
