

Exam / Exam

US ABDOMEN/PELVIS- APPENDICITIS

Date of exam / Exam Date

May 25, 2020 04:58

RENSEIGNEMENT CLINIQUE / CLINICAL INFORMATION:

13-year-old Female with several hours of RLQ pain and vomiting.

PROTOCOLE RADIOLOGIQUE / RADIOLOGIST'S REPORT:

ULTRASOUND OF ABDOMEN AND PELVIS WITH DOPPLER

No previous for comparison.

FINDINGS:

No evidence of hepatic steatosis. The liver appears homogeneous. The gallbladder is unremarkable. Both kidneys are symmetric in size and show normal corticomedullary differentiation. Kidneys show normal Doppler flow. Spleen is mildly enlarged, likely reactive. Bladder wall shows no abnormal thickening. Peri-appendiceal fluid and fat stranding seen. Loculated fluid in pelvis. Reactive mesenteric lymphadenopathy seen.

IMPRESSION:

Findings consistent with acute appendicitis.

Recommend urgent surgical consultation.

Case ID: CASE-OVQUW4-11678
